**Subject:** RE: DermaSilk Order and Questionnaire

Hi Jo,

Nice to hear from you. Also to know that you are from S .

I am back in S already. The earliest appointment with our GP is on 28th of October. She knows how severe the eczema of my daughter is - and she'll see the impact of DermaSilk on her since she started wearing it. I'll ask her to prescribe at least 2 pairs of DermaSilk so that they can be used simultaneously.

Currently, we are wearing the DermaSilk in the evening as it flares mostly in the evening/night time. I already notice that my daughter did not wake up for 2 consecutive nights if we put DermaSilk on. Before she woke up and cried almost every night to scratch her wrists and/or legs.

Thank you very much indeed for your kind attention and cooperation.

I look forward to hearing from you.

Yours,  
A G

**Subject:** DermaSilk Questionnaires

Hi Jo,

I have been trying to reply your message earlier several times but it always fails to send. Hence, I now send it from my yahoo account instead of hotmail's. I hope this will send.

First of all, I am very happy with the results of DermaSilk to my baby. Her skin shows gradual improvement after a week with DermaSilk. Please find the attached Questionnaires for both my baby ) and myself. It's really encouraging. I really would like to have at least a few more pairs for my baby so that she still can use it while being washed. But I'll ask our GP to prescribe it if possible. My baby's sleep has not been disturbed at all during the past week she was wearing DermaSilk - previously she woke up and scratched all over her body. I felt so sorry for her at that time. But she's now happily asleep at night. Her red skin is getting back to normal gradually, though some flaking still is seen. But overall, I am very pleased with the results.

I am happy to share my experience with others who have suffered the same problems. I don't mind you putting my wordings in your testimonial website. I believe it will be useful for others.

Thanks,  
A
